III. Project Summary:

The Upper Colorado River Endangered Fishes Recovery Implementation Program supports multiple projects undertaken by the Utah Division of Wildlife Resources. The work is conducted within three Division Regions in Utah (Northeast, Southeast, and Southern Regions) as well as from the Native Aquatic Species Coordinators office in Salt Lake City. Additionally, the Division cooperates and coordinates with other agencies and researchers across state boundaries within the Colorado River Basin. Efficient coordination of field activities, reporting of research and monitoring results in a timely manner, and effective program administration requires statewide participation and oversight.

Develop, prioritize, direct, coordinate, monitor and annually evaluate Colorado River fishes work program activities, contracts, and budgets for the Utah Division of Wildlife Resources.
